

Attention children's facilities

Hib is Back on the List!

Immunizations for Preschool and Child Care:

- DTaP
- Polio
- MMR
- Varicella (chickenpox)
- Hepatitis B
- Hepatitis A
- ✓ Hib (*Haemophilus influenzae* type B)

The vaccine shortage is over and Hib is again required for any children attending your program that are younger than five years of age.

You may have children who have not received their last dose of Hib. Now is a great time to encourage parents to obtain the vaccine for their child.

Children incomplete for Hib will be excluded February 2011 if they do not receive the necessary dose(s).
